

***Botox<sup>®</sup> / Dysport<sup>®</sup> / Xeomin<sup>®</sup>***

**PROCEDURE:** Inject a highly diluted protein toxin with a fine needle into facial expression muscles. Temporary muscle paralysis softens skin lines and furrows caused by specific muscle action.

**LENGTH:** 15 minutes; **Office Procedure with topical or icing.**

**SIDE EFFECTS:** Temporary stinging, possible bruising.

**RISK:** Poor or asymmetrical effect. Migration of toxin to other muscles causing unwanted and/or asymmetrical result. Drooping of eyelid or double vision that may last for several weeks. Temporary nature of the effect with potential need for repeat and maintenance treatment.

**RECOVERY:** *No exercise for 24 hours. Do not rub treated area(s) for 48 hours. Remain upright for 4 hours. \*Full results will not appear until 5- 7 days after treatment. \**

**DURATION of RESULTS:** 3 to 4 months before repeat treatment needed.

**BEFORE TREATMENT:** Avoid aspirin or ibuprofen at least 48 hours prior to the treatment.  
**No makeup** in areas to be treated before arriving for treatment.
